 District Peers	-	80%	-	-

## District School Rating

Shows an overall snapshot of district quality from 1 to 10 based on multiple measures, like academics, equity, and the school environments, compared to district peers.

See below under District Rating to learn more

- Independent School District
- Average of 5 district peers within Texas
- State average in 2024

## Scorecard Considerations

We use the latest school district in which the candidate worked on to compare with school district data. We pull information from the previous year the candidate started working in the district to reflect the changes in district performance. The highlighted section in the charts corresponds to the latest 3 years (when applicable) the candidate worked in the district. The data is released annually, therefore it won't always be possible to make exact comparisons between candidate professional experience and district data.

See at the end of the document to learn more about the datasource and methodology.
